Information about the BA program in Geology at Colorado Schools of Mines : [Overview](#)

Course list and course information can be found on this site : [Course listing](#)

BA level courses: [Undergraduate Bulletin](#)

MA level courses [Graduate Bulletin](#)

Please be aware that some courses require pre-requisite. This means that you need to be qualified in order to get admitted to these courses.

Students traveling to USA need to be aware that collisions in the timetable might occur. It is therefore necessary to choose more subjects / courses than you need. Please remember to communicate with your study consultant regarding the course plan at University of Colorado. Students can unfortunately not expect to get a final clarification what courses they are admitted to before arriving to USA. It is therefore important to clarify as soon as you arrive to University of Colorado what courses you have been admitted to.

Please contact the study consultant at the department for more information and questions regarding selection of courses.
